71307000T	<p>Spectrophotometer XD 7000 (VIS)</p> <p>The XD series instruments are ideal for routine and spectral analysis. As true all-rounders, the XD 7000 and XD 7500 facilitate work routines, especially with automatic method recognition using barcodes, automatic cell recognition and more than 170 pre-programmed methods. In addition to analytical quality control, they also support Good Labor Practice (GLP). The instruments are available together with bar-coded test tubes and a wide range of accessories from a single source - which is also easy on your wallet. High-quality reference beam optics, usability, easy handling and multilingual global applicability round off the versatility of the VIS and UV/VIS spectrophotometers, which are also equipped for flexible on-site use.</p> <p>Application</p> <p>Boiler Water Cooling Water Disinfection Control Drinking Water Treatment Food and Beverage Galvanization Others Pool-Water Control Raw Water Treatment Waste Water Treatment</p>	1	\$	5,450.00
